Let's all meet in
VANCOUVER
Canada's Sulphur Gateway!
• Seven working sessions
with a special focus on HANDLING, STORAGE AND TRANSPORT OF SULPHUR and METALLURGICAL SULPHURIC ACID OPERATIONS, plus supply and demand, commerce and trade, and plant operations, process, environmental and materials technology.
(Complete with lunch and interval refreshments).
• Exhibition
of TECHNOLOGY, EQUIPMENT and LITERATURE
• Evening events
(to be announced)
• Post conference site tours
in Vancouver and Alberta
British Sulphur's annual Sulphur conference is the main meeting of the world sulphur and sulphuric acid industries. For this year's event we have selected the Westin Bayshore Hotel in the famous and picturesquely situated port city of Vancouver, BC.
Vancouver is the main outlet for Canada's massive output of recovered sulphur, and it was Vancouver that provided the impetus for the development of the modern sulphur forming techniques which have done so much to improve conditions in and around sulphur handling and loading facilities in recent years.
If you would like your name to be added to our mailing list for more information, please contact Rebecca Baird, Conference Secretary.
If you would like to present a paper, please send the title, the name(s) of the author(s) and a 250-350 word summary or abstract to John French, Conference Director, or Alexander More, Conference Manager, to arrive not later than Friday 26 April. In the technical sessions, preference will be given to papers presented by operators.
For further information on exhibition space, please contact Tina Firman, Exhibition Manager, or John French.
